

A DESCRIPTIVE LIST OF THE MOST PLANTED STREET TREES

The following pages include a descriptive list of the most widely used trees for planting along streets. This list will serve as a guide in choosing the trees to be used in the areas shown on the plan map.

Also attached is a list which gives the standards and conditions for tree, shrub and ground cover planting along streets which are a part of the North Carolina Highway System. The Town should apply through their local highway division engineer for a municipal "blanket" permit for planting along streets which are a part of the highway system. This permit allows planting in the road right-of-way, when the recommended standards are followed.
